SWENSON HE

Coding Challenge

General requirements:
- Implement using Kotlin
- Be sure to follow the designs, submissions not matching the designs will not be evaluated

Sample app:
- Create a 3 days weather forecast app with free weather API
  - https://www.weatherapi.com
- Follow the Figma design linked here
- Special Notes:
  - icons returned from API are low resolution and will appear pixelated in your submission, this is OK
  - The background image is static and does not change based on what location is selected by the user
  - The two sub items for 'today' are `wind_mph` and `humidity`
